How many generating stations are there in Grenada?

The Company owns and operates one main generating station in Grenada with an installed capacity of 39 MW, a 1.920 MW station in Carriacou and a 483 KW station in Petit Martinique. Our distribution network is comprised of about 220 miles of 11KV distribution lines, which serve 99.5% of the population.

Where does Grenlec generate electricity?

With total installed capacity of 48.9MW and peak demand of 33.7MW, Grenlec generates from three locations in Grenada, Carriacou and Petite Martinique. A 33kV transmission network and two substations at Queen's Park and Grand Anse ensure reliability in the south of Grenada.

How many employees does Grenlec have?

Two hundred and thirty-five employees provide integrated services of generation, transmission and distribution of electricity to more than 40,000 customers. GRENLEC is actively pursuing a strategic goal to provide for 35% of demand through renewable energy generation by 2016.

Electrical distribution cabinets are highly specialized cabinets focused on precise management and control of reactive power within electrical systems. Reactive power, alternating between sources like generators and consumers, is characterized by fluctuating nature that, despite its presence, doesn't perform useful work.

Can North Americans use Electronics in Grenada without an Adapter? No! North Americans will need an adapter for the outlets and a transformer for the voltage when traveling to Grenada. North Americans device plugs will not work with the outlet types in Grenada. Also, the voltage in Grenada is different from North American voltages.. Can Europeans use Electronics in ...
