

Fuel mix (fossil fuels vs renewables) Grenada derives almost all of its energy from imported hydrocarbons. In 2020, non-renewables accounted for roughly 98% of installed capacity and electricity generation, with solar energy making up the difference. The government of Grenada has expressed concerns about climate change, but continues to rely on diesel and refined ...

Environment The Victorian Minister for Planning has determined that the Environment Effects Statement (EES) undertaken by GB Energy under the Environment Effects Act 1978 is appropriate and supports the development of the Golden Beach Energy Storage Project. The EES process is a significant undertaking and underpins the development of the Project according to ...

Grenada: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

GB Energy welcomes the Victorian Government's introduction of amendments to the Offshore Petroleum and Greenhouse Gas Storage Act, to enable the offshore storage of natural gas in Victorian coastal waters. This is an important milestone for the Golden Beach project, which will provide much needed initial gas supply and subsequent storage infrastructure for the east ...
