

What are the main energy sources in Guinea?

Three primary energy sources make up the energy mix in Guinea: fossil biomass, oil and hydropower. Biomass (firewood and charcoal) makes the largest contribution in primary energy consumption. It is locally produced, while Guinea imports all the petroleum products it needs.

Where can I find information about energy in Guinea?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Guinea on the IndexMundi homepage. Find relevant information for Guinea on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

What is electricity used for in Guinea in 2021?

No data for Guinea for 2021. Electricity is primarily used for heating, cooling, lighting, cooking and to power devices, appliances and industrial equipment. Further electrification of end-uses, especially transportation, in conjunction with the decarbonisation of electricity generation, is an important pillar of clean energy transitions.

Did Guinea import energy?

Guinea did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used. For example, crude oil is refined into many different kinds of fuels and products, while coal, oil and natural gas can be burned to generate electricity and heat.

Where can I find information about electrification in Guinea?

Find an overview of the electrification investment scenarios (2025 and 2030) for Guinea on the Global Electrification Platform (GEP). Find relevant information on the regulations and Guinea's strategy in the energy sector on the homepage of the African Energy Portal.

Does Guinea still have electricity?

But it is still growing rapidly in many emerging market and developing countries, especially those where a significant fraction of the population still lacks access to electricity. No data for Guinea for 2021. Electricity is primarily used for heating, cooling, lighting, cooking and to power devices, appliances and industrial equipment.
