

Who is solar in Spain?

Solar in Spain has been active in renewable energy since 1999. So far, we have successfully completed over 3,000 projects and we have developed a really strong combination of experience and knowledge in the sector. As a company, we are totally dedicated to renewable energy.

What can you learn from Sunhero?

Learn the fundamentals of solar panels and renewable energies with short videos that answer all your questions. Our CEO, Christopher Cederskog talks with guests about solar energy, electric cars, and new clean technologies. Discover the testimonials and experiences of installing solar panels with Sunhero, shared by some of our customers.

Why are solar panels so popular in Spain?

Solar panels in Spain have burst into the population with great success, taking advantage of the sun's rays to produce energy in our homes. Without going any further, in 2021, self-consumption marked a record year with an increase of more than 100%, reaching up to 1,203 MW installed.

Is solar energy a good investment in Spain?

As you can see, solar energy has indisputable potential in Spain. Installing solar panels in Spain means significant financial savings from day one, making you the owner of your energy. Similarly, the use of renewable sources such as solar energy leads us to an energy model based on sustainability.

How much solar power does Spain have?

In 2008 the Spanish government committed to achieving a target of 12% of primary energy from renewable energy by 2010 and by 2020 expected the installed solar generating capacity of 10 GW. Since 2010, Spain has been the world's leader in concentrated solar power (CSP).

Is Spain a leader in concentrated solar power?

As a legacy from Spain's earlier development of solar power, the country remains a world leader in concentrated solar power, accounting for almost a third of solar power installed capacity in the country, a much higher ratio than that for other countries as of 2017.
