

What are the three energy transition policy paths in Inner Mongolia?

This paper utilizes the energy transition experiences of other nations and applies them to the specific context of Inner Mongolia to formulate three energy transition policy paths: developing renewable energy scenario, developing CCS technology scenario, and the carbon pricing scenario.

Can Inner Mongolia achieve a low-carbon energy transition?

Therefore, both international experience and the realistic conditions in Inner Mongolia indicate that Inner Mongolia can realize a low-carbon energy transition through phasing out coal and advancing renewable energy development.

Does Inner Mongolia have a '14th five-year plan for hydrogen energy development'?

In 2022, Inner Mongolia unveiled the '14th Five-Year Plan for Hydrogen Energy Development (2021-2025)' to proactively advance the hydrogen energy sector. Nevertheless, the limited availability of water resources in Inner Mongolia imposes specific limitations on the advancement of hydrogen energy technologies.

7. Conclusion

How will Inner Mongolia affect China's Energy Security?

If Inner Mongolia focuses on short-term carbon reduction, it can promote energy transition and reduce carbon emission by promoting carbon pricing in the early stage, but this energy transition path will affect China's energy security.

Is Inner Mongolia a major energy supplier in China?

Inner Mongolia is a significant energy supplier in China, supplying about 20 percent of its electrical production to the nation. In the "Business as usual" scenario, future energy demand will align with economic growth. As electrification progresses, China's electricity demand will increase significantly each year.

Is coal power phased out in Inner Mongolia?

However, coal power is phased out in the CP scenario by 2032 and in the RE scenario by 2040. The proportion of renewable power generation steadily rises, reaching 94 % and 100 % in 2060, respectively. Fig. 5. Changes in Inner Mongolia's electricity generation structure under different scenario. 5.3. Carbon emission and carbon emission structure
