

Who is Honeywell energy & sustainability solutions?

As a global technology leader, Honeywell Energy & Sustainability Solutions (ESS) enables the energy evolution, provides solutions that reduce emissions, and delivers innovative sustainable materials to our customers across industries.

What is Honeywell doing with ESS Tech?

Honeywell announced a strategic collaboration with ESS Tech, Inc. to advance technology development and market adoption of iron flow battery energy storage systems.

What is Honeywell ESS?

Honeywell is Enabling the Energy Transition through Technology Breadth and Expertise As a global technology leader, the every-day mission of Honeywell ESS is creating future-forward solutions that change the way the world works. The inventors, chemists and engineers of Honeywell are continually pushing technological frontiers.

Why did Honeywell invest in ESS?

Honeywell has made an investment in ESS as part of this collaboration. The relationship builds upon each company's development of energy storage systems, and brings together ESS' market-leading, patented IFB design with Honeywell's advanced materials and energy systems expertise.

Why is Honeywell partnering with ESS?

Honeywell and ESS are working together to meet growing global demand for long-duration energy storage (LDES), driven by the rapid increase in renewable power generation. This is creating a substantial and fast-growing market as countries worldwide transition to zero carbon energy.

Where can I find more information about Honeywell?

For more information visit [Honeywell \(\)](#) is a technology company that delivers industry-specific solutions that include aerospace products and services; control technologies for buildings and industry; and performance materials globally.

Honeywell UOP offers technology to produce SAF from a variety of sustainable feedstocks, including vegetable oils, animal fats, non-food-based fats, second-generation feedstocks such as camelina, jatropha and algae, and low-carbon-intensity alcohols. This empowers fuel producers with the flexibility to choose the bio feedstock that best suits their

ADNOC, the state-owned oil company of the United Arab Emirates, will use Honeywell's LNG technology and equipment at its Ruwais LNG project. The facility is expected to produce up to 9.6 million tonnes of LNG per year. Natural gas is often considered a bridge fuel in the energy transition, providing a lower-emissions alternative to other fossil fuels.
