

How do I prepare for winter home maintenance?

Every home, climate and property are different. Use this checklist as a general guide to winter home maintenance and add items that are unique to your property such as draining the swimming pool, cutting firewood or stocking up on pellet stove fuel. For new homeowners, we suggest using each season to help you prepare for next year.

How do I maximize my battery storage system for cold weather?

The first step to maximizing your battery storage system for cold weather is to locate it in a place protected from the elements, such as a garage, house, or insulated building. Keeping the batteries in an insulated area ensures you maximize their performance, even if the temperatures outside are dropping.

Do you need a home repair in the winter?

Maintaining a home in the winter with a busy schedule is a big task. If you need help or you need a home repair, just give Mr. Handyman a call. We can help seal drafty windows or make any necessary repairs to help you keep your home in great shape. Give us a call or request an appointment online. Get your home winter-ready!

How do I keep my home warm in the winter?

Monitor windows and doors for drafts. During deep cold spells (less than 15 degrees for more than 24 hours) keep all interior doors open to encourage heat circulation. Replace your HVAC air filter every three months. Since keeping our homes warm and cozy in the winter is a priority, why not make it easier and less expensive?

Should you prepare your house for winter?

It's easy to forget, or ignore, the importance of preparing your house for winter. Staying cozy inside your home sounds a lot better than bundling up to brave the cold or checking off a to-do list. However, maintaining your home during the winter will help you avoid expensive repairs or surprises.

Can a programmable thermostat save you money?

A programmable thermostat is a simple way to save on heating costs if set up properly. Use the programs to automatically turn the heat down when you're not at home or sleeping. You can even control smart thermostats from your phone or use an app to monitor energy usage. Maintaining a home in the winter with a busy schedule is a big task.

However, there are ways to keep your house warm without breaking the bank. We've compiled a list of strategies, from simple lifestyle changes to smart home upgrades, that will help you reduce heating costs for a

...
