

## How to wash steel cabinet IP65 with rodent waste

Have used plastic storage totes to store food, but rodents still bite their way through the plastic and get inside the storage containers. I'm classless as to what type of plastic is "rodent proof" ...

A dead rat can sometimes be a sign of an infestation, and it's common for rats to die in wall cavities. If you have a dead rat in your home, ask pest control services to remove and cleanse ...

A lot of rodent feces around floor and shelves. I heard i should be wary of hantavirus so I was looking to spray a bleach solution to coat the floor and walls before I shovel all this crap into ...

Additionally, bleach does not effectively address all the pathogens found in rodent waste. Instead, it's advisable to use a disinfectant specifically designed for neutralizing rodent ...
