

What are Indonesia's energy opportunities?

The opportunities will include projects in solar, hydro, and geothermal power. The move comes from the new Subianto administration. Credit: Millenius via Shutterstock. Indonesia has unveiled plans to facilitate international investors to develop 75GW of renewable power in the country over the next 15 years, reported Reuters.

Can power wheeling boost economic growth in Indonesia?

Power wheeling in Indonesia can boost economic growth through investments, create new jobs, and help the country meet its decarbonization targets without burdening the national budget. It would also help PLN focus on grid modernization and improvements to facilitate energy transition.

How much power does Indonesia have?

Hashim did not provide details on the plans for the remaining 25GW. Indonesia's current power capacity exceeds 90GW, with coal accounting for more than half of this figure and renewables less than 15%. The country currently lacks nuclear capacity, a contentious issue given its susceptibility to earthquakes.

Should Indonesia consider community-based energy producers?

Indonesia should consider community-based energy producers, not just big power plants, in its transition to clean energy, according to think tank Center of Economic and Law Studies (Celios). This approach could generate \$683 million (IDR10.6t) in economic value over 25 years, creating 96 million jobs across various sectors, Celios said.

Will Indonesia phasing out coal-fired power plants?

This includes phasing out coal-fired power plants and transitioning to the aforementioned renewable energy sources. Perusahaan Listrik Negara, Indonesia's state-owned power utility, is in the process of designing a new green transmission line that will extend 70,000km, as stated by CEO Darmawan Prasodjo in a company statement.
