

What is energy in Belarus?

Energy in Belarus describes energy and electricity production, consumption and import in Belarus. Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. Belarus is very dependent on Russia.

Will ENTSO-E improve the reliability of Belarus's energy system?

The strategic plans of the Baltic States' and Ukraine's energy systems to join the European Network of Transmission System Operators for Electricity (ENTSO-E) energy system have reduced the external connections - and thus the reliability - of Belarus's energy system.

Is ion energy a good investment in Mongolia?

With one of the largest exploration licenses in Mongolia, ION Energy is poised to become a significant player in Asia's booming Lithium market. Exploration efforts are now underway. 03. Strategic Advantage Vs. Peers
Mongolia is a low-cost year round operating environment. Early work indicates shallow aquifers.

Who regulates electricity in Belarus?

Belarus does not have a single independent energy regulatory authority. The Ministry of Antimonopoly Regulation and Trade is responsible for regulating electricity and heat tariffs for industrial customers, independent suppliers and all categories other than residential consumers, based on the 2011 Decree on Price Tariffs.

When did ISO 50001-2013 become valid in Belarus?

On 1 September 2013, the STB ISO 50001-2013 standard on energy management systems became valid in Belarus. Unlike energy audits, it is voluntary for organisations to implement an energy management system.

Where does Belarus get gas from?

Belarus transits gas from Russia to Ukraine, Poland, Lithuania and Russia's Kaliningrad region (through Lithuania). Gazprom-TransGaz operates the Yamal-Europe transmission pipeline that provides gas to Germany and is owned by Gazprom.
