

What type of energy is used in Iraq?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Iraq: How much of the country's energy comes from nuclear power?

What is Iraq's refining capacity?

Iraq's total effective refining capacity is about 900,000 b/d. The Iraqi government plans to reduce petroleum product imports by rehabilitating the refining sector and building new refineries, but the government has struggled in its efforts to attract the foreign investment needed in the downstream sector.

How much electricity does Iraq generate a year?

Iraq's net electricity generation grew by an annual average of about 7% each year between 2010 and 2020, reaching an estimated 92 terawatt-hours (TWh) (Figure 5).

What is the IEA license for Iraq?

IEA. Licence: CC BY 4.0 World Energy Outlook, Iraq's energy sector, Iraq's electricity supply and demand to 2030.

What is Iraq's crude oil production capacity?

We estimate that Iraq's crude oil production capacity was 4.6 million b/d as of mid-2022, down from 4.8 million b/d in 2020. Export infrastructure at the southern oil terminals is constrained, and midstream projects are often delayed because of insufficient investment and bureaucratic hurdles.
