

What is the future of electricity supply in Iraq?

There are a number of pathways available for the future of electricity supply in Iraq but the most affordable, reliable and sustainable path requires cutting network losses by half at least, strengthening regional interconnections, putting captured gas to use in efficient power plants, and increasing the share of renewables in the mix.

Is Iraq a good country for solar energy?

Iraq holds abundant oil and gas resources and has strong solar PV potential. Its production to 2030 is set to be the third largest contributor to global oil supply. By the same year, the government expects that renewable capacity will amount for 5% of the country's total system capacity.

Why is energy important in Iraq?

Energy in Iraq plays a crucial role in both the national economy and the global energy markets due to the country's vast oil reserves and significant status within the Organization of the Petroleum Exporting Countries (OPEC). Iraq holds abundant oil and gas resources and has strong solar PV potential.

How much natural gas did Iraq produce in 2022?

Iraq consumed significantly more natural gas than it produced in 2021, primarily for electric power generation. The country also flared over 630 billion cubic feet (Bcf) of natural gas in 2022 due to inadequate pipeline and processing infrastructure, making it the second-largest flaring country globally.

How does Iraq generate electricity?

Iraq's electricity generation primarily depends on fossil fuels. In 2021, natural gas was the largest source at 57.3% of the total, followed by oil at 36.7%. Renewable energy, mainly from hydroelectric power, contributed 5.9%. As of 2023, the 30 gigawatts (GW) of installed capacity cannot meet summer peak demand.

What percentage of Iraq's electricity comes from natural gas?

Nearly all (about 98%) of Iraq's electricity generation is from oil and natural gas.⁶² Natural gas use in the electric power sector increased after 2016 because Iraq began importing natural gas from Iran to increase its own supplies. Hydroelectricity accounts for most of the remaining share of electricity production.⁶³

Energy Prices In the Euro Area increased to 145.92 points in November from 145.20 points in October of 2024. Energy Prices in the Euro Area averaged 91.05 points from 1996 until 2024, reaching an all time high of 171.36 points in October of 2022 and a record low of 52.33 points in February of 1999.

By John Lee. QatarEnergy is to take a 50-percent stake in the TotalEnergies solar energy project in Iraq: Partnership Agreement: QatarEnergy has signed an agreement with TotalEnergies for a solar power project in Iraq as part of the Gas Growth Integrated Project (GGIP). Stake Distribution: QatarEnergy will acquire a 50% stake in the project, with

Iraq holds abundant oil and gas resources and has strong solar PV potential. Its production to 2030 is set to be third largest contributor to global oil supply. By the same year, the government expects that renewable capacity will amount for ...

The management of surface water in basins has become of the utmost importance, especially given the expected changes in climate and land use. Therefore, the current work aimed to aid the management of the Khazir River basin by estimating sediment yield and surface runoff using the Soil and Water Assessment Tool (SWAT) at the hydrological response ...

Overview interest facts - 10th Iraq International Energy Expo & Conference 2025. The Tenth Iraq International Energy EXPO & Conference, Sponsored by The Prime Minister and The Ministry of Electricity, achieves opportunities to enhance cooperation with investment companies specialized in the field of electric energy, as well as to build bridges towards economic integration and ...

Following the decision to use the euro, taken by the Iraqi cabinet last month, Baghdad wrote to UN Secretary-General Kofi Annan two weeks ago asking the secretariat to instruct Banque Nationale de Paris-Paribas - where Iraq's existing UN-controlled dollar escrow account is held - to open a second account in euros.

This has introduced a number of vulnerabilities to Iraq's energy system. For example, payment issues last summer led to Iran cutting exports, significantly exacerbating electricity shortages in Iraq during peak seasonal demand.

Iraq holds the 12th largest natural gas reserves in the world, estimated at 131 trillion cubic feet (Tcf) at the end of 2022, predominantly located in large oil fields in the south and mostly associated with oil production. Despite these substantial reserves, Iraq faces regulatory, investment, and infrastructure challenges, which have kept natural gas production largely unchanged since 2016. The majority of Iraq's natural gas, about two-thirds, is produced as a byproduct of oil extraction. ...

Held in cooperation with the Iraqi government represented by key energy and economic ministries, and with the full support of the Organisation of Petroleum Exporting Countries (OPEC), Iraq Energy Institute's 6 th flagship Iraq Energy Forum (IEF 2022) returns on 18-20 June 2022 at the American University of Iraq - Baghdad (AUIB) in Baghdad. This includes a full open day ...
