

How many solar power sites are there in Iraq?

In July 2019, Iraq's Ministry of Electricity invited independent power producers to participate in developing seven PV solar power sites with a combined capacity of 755 megawatts (MW) in the range between 30 MW to 300 MW. Many local and foreign developers saw the announcement as a move forward in an attempt to diversify the country's energy mix.

Does Iraq have a solar power plant?

The contracts also cover a water intake project for injection into oil reservoirs. The solar power plant will be Iraq's first utility-scale solar power project. While the country has several other solar plans in the pipeline, the TotalEnergies project is the first to proceed to the implementation phase.

What is Iraq's solar energy strategy?

Iraq's solar energy strategy should be based on attracting foreign direct investments with strong commitment to diversifying its energy mix and to become energy independent bolstered by its willingness to collaborate with international array of local and foreign partners. Iraq's path forward is not, however, free of potential pitfalls.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

Will TotalEnergies build a solar power plant in Iraq?

French energy major TotalEnergies will build a 1-gigawatt solar power plant in Iraq as part of a cluster of contracts it was awarded in 2021 for an integrated project that entails a total investment of \$27 billion over 30 years.

Does Iraq need to invest in solar energy?

The country's approach by Gaffney, Cline & Associates in 2018 for the to attract investment in solar energy has not Government of Iraq (GoI), Iraq needs to invest been very successful previously, including the more than US \$44 billion for five years in gas-to- government offer of US\$ 3.5 per kWh feed-power value chain¹¹.

Iraq is planning to build solar plants and its first green hydrogen project as part of a strategy to tackle power shortages and reduce its carbon footprint. The country's cabinet has approved a proposal to install 12 ...

One of the essential tools Iraq has in its fight against climate change is the infinite potential of the sun as a source of energy. In a sun-rich country like Iraq, solar solutions are a cornerstone in the transition towards renewable energy and ...

QatarEnergy and TotalEnergies have agreed to jointly develop a 1.25 gigawatt (GW) peak solar power project in Iraq's Basra region, the companies said on Monday. Under the agreement, which awaits regulatory ...
