

A Jordanian citizen residing in Orlando, Florida, has been charged for allegedly destroying solar panels at an energy facility and making threats against businesses in the state because he ...

Solar energy is the way of the future. It will help America reach its clean energy goals of achieving a carbon-free electricity sector by 2035 and a transition to net-zero greenhouse gas emissions by 2050. But there is one major factor getting in the way of these goals- money. Many people simply can't afford the cost of solar panels and installation.

This solar energy law, which have made the change in all terms of Solar in Israel, and placed the solar energy on the front of the energy market and gave the private solar energy manufacturers the option to sell the green solar power to ...
