

What percentage of Jamaica's energy is renewable?

As of 2020, Jamaica's use of renewables accounted for approximately 11 percent of its energy: 6.5 percent wind, 3.5 percent hydropower, and 1 percent solar power.

Where does Jamaica's energy come from?

The majority of Jamaica's energy has traditionally come from imported coal, petroleum and oil products. Combustible renewables and waste -- used to form the cheaper, environmentally-friendly alternative, bio-gas -- account for a meagre percentage of the country's energy supply, while hydro, solar and wind power represent less than 11 percent.

When was Jamaica's last public procurement for renewables?

According to opposition spokesperson Phillip Paulwell, who is Jamaica's shadow minister on energy, the last public procurement for renewables was done in 2014, when the current renewable-related projects were established.

Why is Jamaica resetting its renewables target?

Jamaica's energy grid is now dominated by liquefied natural gas and oil. The prices of those fossils have spiked since the onset of the pandemic. And within that time, the Jamaican government reset its renewables target from 30 per cent to 50 per cent.

Does Jamaica have a monopoly on electricity?

Jamaica's electricity provider currently enjoys a monopoly. Terrelonge believes that unless the Jamaica Public Service Company (JPS) is forced to reduce costs, nothing will be done. She also finds that while Jamaica is attempting to diversify energy resources, it appears to be on an impromptu or project basis, instead of on a national level.

Can JPS distribute electricity in Jamaica?

While Jamaica has several firms that generate electricity, only JPS can distribute the power, due to its exclusive licence with the Jamaican government as operator of the national grid.

On August 30, 2023 the Massachusetts Electric Distribution companies, in coordination with the Massachusetts Department of Energy Resources, are issuing an RFP for Long-term Contracts for Offshore Wind Energy Projects pursuant to Section 83C of Chapter 169 of the Acts of 2008, as amended by the Energy Diversity Act, and the Act Driving Clean ...
