

What is the Energy Outlook for Costa Rica?

This information is based on IEA analysis carried out within the framework of Latin America Energy Outlook 2023. Costa Rica Energy Profile - Analysis and key findings. A report by the International Energy Agency.

Does Costa Rica have an electricity grid?

Only a few countries have developed an electricity grid powered mostly by renewable sources. Surprisingly, Costa Rica is one of them. For years, Costa Rica has relied on clean energy for up to 99% of its electricity, putting it in the league of innovative countries like Iceland, Norway and New Zealand.

Is Costa Rica a good place to buy energy?

Erick Rojas, the vice president of the Chamber of Energy Distribution and Telecommunications Companies (CEDET), states that energy prices in Costa Rica are currently lower than those in Europe, the United States and the rest of Central America. Costa Rica also exports a portion of its energy to neighboring countries.

Does Costa Rica have a Green Energy Miracle?

Costa Rica's green energy miracle is at a critical juncture. According to the National Electricity Control Center, Costa Rica's renewable energy generation decreased from 99% in 2021 to 98% in 2022. It is estimated to be between 92% and 95% in 2023.

How has Costa Rica diversified its energy production?

Costa Rica later began to gradually diversify its energy production. "We exploited our geothermal sources, but when greenhouse gases became a concern, ICE began to focus on wind energy." As the population has grown, the demand for energy has increased.

Does Costa Rica export energy?

Costa Rica also exports a portion of its energy to neighboring countries. President Carlos Alvarado (2018-2022) proposed a ban on oil and natural gas exploitation, but it has remained mired in Congress ever since.
