

Kiewit es una de las organizaciones más grandes y respetadas en ingeniería y construcción de Norteamérica. El compromiso de Kiewit con la seguridad, la calidad y la conservación del medio ambiente está arraigado en todo lo que hacemos. Está visible en nuestros valores fundamentales, en el trabajo que hacemos y en nuestra gente.

The Kiewit Energy marketing, creative and proposal team provide get-work services to an array of markets, including power generation, transmission and distribution, renewables, industrial, oil and gas, and water/wastewater. Individuals in this department get exposure to a mix of high profile, complex pursuits across North America valued from ...

Thank you for your interest in Kiewit. For inquiries, provide your information below. Please note: All job postings and career-related information can be found at [kiewitjobs](#). Resumes and sales pitches will not be sent for review. Current or previous employees: For general, human-resource inquiries (including income statements and tax forms), please contact us by calling [...]

Con una fuerte presencia local y acceso a una vasta red de recursos, Kiewit puede movilizar rápidamente fuerzas de trabajo de alto rendimiento y proporcionar las mejores soluciones y valor para los clientes. Desde los trabajos más pequeños hasta los proyectos multimillonarios, nuestros recursos y experiencia garantizan que los clientes reciban la máxima calidad y [...]

More recently, Kiewit has devoted countless time and resources to various CCUS research and pilot projects, including an engineering study backed by the U.S. Department of Energy to retrofit an existing power generation station in Illinois with a system designed to capture 95 percent of carbon emissions.

To supply energy to the northeast United States, Kiewit engineered, procured, constructed and started up this 485-megawatt combined-cycle gas plant. Kiewit carefully planned, coordinated and installed the GE 7HA.02 gas and Alstom D652 steam turbine equipment in a single-shaft configuration, a first-of-its-kind arrangement at the time of construction for the major ...

Kiewit Energy Canada is headquartered in Calgary, Alberta. We are a major industrial contractor that work on projects that involve construction of oil & gas facilities such as oil sands processing, including steam-assisted gravity drainage facilities, upgrading & refining, midstream facilities, power & co-generation, terminal projects (ex. LNG, LPG, etc.), and major mine developments.

The Woodbridge Energy Center is a 700-megawatt gas-fired power plant located on the site of an abandoned chemical plant. It generates enough electricity to power more than 600,000 homes while increasing grid reliability. The facility used the most advanced generation technology available and at completion was one of

the nation's cleanest and most efficient stations. [...]

Since 1945, Kiewit, the official magazine of Kiewit Corporation, has been showcasing some of our most challenging, influential and cutting-edge projects. ... Renewable energy: Kiewit is in it to stay. Harnessing the power of sunlight and wind has become a top priority for Kiewit Energy Group Inc. (KEG) as the ... Read the article.

Grid-Scale Energy Storage. Kiewit provides design and construction services and expertise for emerging storage technologies including the following: Molten Salt. Currently the most common energy storage method for large concentrated ...

Field and office engineers are essential to running successful operations on Kiewit projects. In this position you'll learn the ins and outs of managing projects, supervising subcontractors and coordinating with vendors. Day-to-day ...

Kiewit has consistently been a leader in delivering energy-efficient solutions for some of the most demanding healthcare environments nationwide. For example, our work at the University of Washington Medical Center (UWMC) involved renovating the Electrophysiology-1 (EP-1) Lab, where we upgraded mechanical, electrical and plumbing systems to ...

Glenfarne Energy Transition's subsidiary, Texas LNG Brownsville, has appointed Kiewit as the engineering, procurement and construction (EPC) contractor for its upcoming liquefied natural gas (LNG) export terminal.. The four-million-tonnes-per-annum (mtpa) facility in the Port of Brownsville, Texas, will be developed under an LSTK contract.

The Sunrise field is estimated to hold 3.7 billion barrels of bitumen including 0.36 billion barrels of proved, 2.48 billion barrels of probable and 0.86 billion barrels of possible reserves. Kiewit supported the front-end engineering design of Husky Energy's 120,000-barrel-per-day steam-assisted gravity drainage plant that produces oil from the Sunrise field. Kiewit co-located with ...

HOUSTON AND BROWNSVILLE, TEXAS, November 4, 2024: Texas LNG Brownsville LLC ("Texas LNG"), a four million tonnes per annum ("MTPA") liquefied natural gas ("LNG") export terminal to be constructed in the Port of Brownsville, Texas, a subsidiary of Glenfarne Energy Transition, LLC ("Glenfarne"), has selected Kiewit, through its subsidiaries ...

Kiewit cuenta con más de 40 años de experiencia en el desarrollo de proyectos de energía renovable como la eólica, la solar, la geotérmica y la hidroeléctrica. Hoy en día, estas fuentes de generación alternativas son más viables y rentables que nunca, y nuestro enfoque innovador en el desarrollo de proyectos nos sitúa en una buena ...
