

Who generates electricity in Kiribati?

Sector context. Grid-connected electricity in Kiribati's capital, South Tarawa, is generated and distributed by the Public Utilities Board (PUB), a state-owned electricity and water utility.

Does Kiribati have a solar power system?

Kiribati has been successfully using solar PV for outer island electrification for over 20 years. The government-owned Kiribati Solar Energy Company (KSEC) has a pool of technicians skilled in the installation and maintenance of off-grid solar power systems.

How does Tarawa use electricity in Kiribati?

Tarawa uses the bulk of the energy imported to Kiribati. Kiritimati is the largest island in Kiribati, but has little land transport. Instead, most residents are connected to one of the small diesel-powered electricity grids located on the island.

Why is electricity so expensive in Kiribati?

Of the 7,877 households in South Tarawa (44% of total households in Kiribati), 72.4% are connected to grid electricity. Access is largely for lighting, and that lighting is often insufficient, inefficient, and expensive. The high electricity cost has suppressed demand and has hindered growth in the commercial and tourism sectors.

Why are there no independent power providers in Kiribati?

Also, despite the potential for revenue generation from the high electricity costs, there are currently no independent power providers in Kiribati. Barriers to private sector investment include (i) lack of an enabling policy and regulatory framework, (ii) credit worthiness of PUB as an off-taker, and (iii) small transaction sizes.<sup>8</sup>

Will Kiribati install a 516 kWp solar PV system?

Kiribati, with the support of the WB, has agreed on four sites where an initial 516 kWp (STC) of solar PVs are to be installed with funding from AusAID through the Pacific Regional Infrastructure Facility and the Global Environment Facility.
