

Why is electricity expensive in Kosovo?

Usually, in Kosovo the imported energy is much more expensive than export. This is because Kosovo imports energy one day before needed, in the other hand energy is exported during the night when the demands are under generating level. Imports and exports have a negative impact for electrical energy price.

Does Kosovo need a lignite power plant?

Kosovo, rich in lignite coal reserves, relies on outdated Yugoslav-era power plants that cannot meet its increasing energy demands. The 2023 National Energy Strategy aims to raise renewable energy to 35% of the energy mix, reduce greenhouse gas emissions by 32%, and phase out a lignite-fired power unit by 2031.

Who is Kosovo Energy Distribution & Supply Company (KEDS)?

Kosovo Energy Distribution and Supply Company (KEDS) is a company operating throughout Kosovo having the exclusivity for electricity supply and distribution in the territory of Kosovo. Since May 2013, Kosovo Energy Distribution and Supply split from Kosovo Energy Cooperation and started its operational activities as a joint stock company.

What does Kosovo's Energy Strategy look like?

The Government of Kosovo is currently finalizing a long-awaited energy strategy where it is expected to announce the eventual decommissioning of one of the coal-fired power plants, set a renewable energy target for 35 percent of all electric energy consumption by 2031, and further integrate in regional energy markets.

How can Kosovo improve its energy sector?

The Group's commitment to helping Kosovo improve its energy sector is broad: projects are designed to improve energy efficiency, ease the policy and regulatory environment for renewable energy and energy efficiency, address the environmental legacy of the old power plants, upgrade power generation to meet demand, and improve water supply.

What energy sources can Kosovo use?

There are three main sources of energy Kosovo can potentially use to satisfy this demand--lignite, gas and renewables. Lignite: We no longer see any realistic prospect for external financing of a new lignite power plant in Kosovo.

Overview Distribution Policy and regulation Renewable energy targets Electricity generation Transmission Electricity consumption Tariffs The distribution network, as a regulated energy activity, is responsible for the operation and maintenance of the distribution system and the management of the generators connected to the distribution system. Distribution network consists of voltage lines of 35 kV, 10(20) kV, 6 kV and 0.4 kV, as well as relevant substations of the level 35/x kV, 10(20)/0.4 kV and 6/0.4 kV. Kosovo Energy Distribution and Supply Company (KEDS) is a company operating throughout K...
