

Should Iraq rely on state financing for energy projects?

There has scarcely been a more urgent time for Iraq to pursue crucial reforms in its energy sector to ensure that investment continues even when government revenues have been decimated by low oil prices. The alternative of continuing to rely on direct state financing of large projects only increases the risk that these projects are delayed.

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

How can Iraq improve energy sustainability?

According to Jafar, current operations in Iraq, like reducing carbon dioxide emissions and using natural gas to enable renewable sources, are vital to developing energy sustainability and contributing to the global climate agenda.

Can Iraq achieve energy self-sufficiency without regional aid?

However, the path to energy sufficiency remains a considerable challenge for Iraq even with regional aid. Without domestic reforms to address the underlying causes of the energy crisis, Iraq's journey towards achieving energy self-sufficiency is still a considerable distance away.

Will IEA support Iraq's Energy reforms?

As Iraq's newly formed government begins to tackle the long list of considerable challenges it faces, the IEA stands ready to support the country in its efforts to enact the reforms that will help its energy sector - and its economy - meet its vast potential.

How has the turmoil impacted Iraq's power infrastructure?

But the turmoil has also undermined the country's ability to maintain and invest in its power infrastructure. This report maps out immediate practical actions and medium-term measures to tackle the most pressing problems in Iraq's electricity sector.
