

The new European Energy project will significantly boost Latvia's solar energy generation, strengthening its position in the renewable energy market. "Latvia is an important market for European Energy, not least because of its appetite for renewable energy. According to the Latvian National Energy and Climate Plan, the share of renewable ...

ST Board Chairman Sandis Jansons said that solar power has been a notable addition to the country's total energy portfolio in recent years - solar panels generated more than 128 gigawatt hours (GWh) of electricity in 2023. In Latvia's total electricity production balance, it is still a small part - about 2%.

Roberts Samtins, the CEO of AJ Power group, says: "In Latvia, solar energy has become one of the most attractive investments in the market. Due to several circumstances, now is the best time for implementation of such ...

European Energy started developing renewable energy projects in Latvia in 2021, and with the opening of its office in Riga, four employees have joined the company in Latvia to develop a strong pipeline of renewable energy projects in the country. ... "European Energy's mission is to harness the resources of wind and solar energy provided by ...

European Energy, a global leader in renewable energy development, is ready to start construction of its first solar park in Latvia. This project, spanning 138 hectares in Targale, Ventpils county, will boast a ...

Sunly, a renewable energy developer based in Tallinn, Estonia, has started work on three large-scale solar parks in Latvia.. The projects include a 54 MW solar park in the Valmiera municipality of ...

14 ????&#0183; Add to an existing briefcase.. European Energy has divested half of the 148MW Targale solar park in Ventpils, the largest project of this technology in Latvia, to Danish administrative community Sompension Lorem ipsum dolor sit amet, consectetur adipiscing elit. Phasellus ultrices urna eu ...

Latvia has lagged behind its Baltic neighbours in solar energy capacity. 2023 Estonia's solar power capacity reached 822 MW, and Lithuania's hit 1,165 MW. In contrast, Latvia's solar capacity stood at only 500 MW. This new solar project represents a crucial advancement for Latvia, helping to enhance its position in the renewable energy ...

The potential for solar energy in Latvia remains largely untapped, according to Alnis Balins, Head of Riga office in European Energy: "Electricity production from renewable resources in Latvia has seen significant growth in recent years, but the momentum gained so far is not enough, and there is still too little solar and wind energy in ...

Solar Energy Latvia ir vienīgais oficiālais parstavis Baltijas valstīs Solarstell montāžas sistēmām. Saules paneli no Trina Solar Trina Solar līdz šim ir labojusi 21 pasaules rekordu par saules panelu efektivitāti un modulu jaudu.

Latvia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic. Our World in Data. Browse by topic. Latest; Resources.

Denmark-based European Energy will soon commence construction on its first solar farm in Latvia, a 148 MW facility featuring 240,000 solar panels near Targale in Ventspils County. Upon completion, the project will generate 154,550 MWh annually, supplying electricity to around 40,000 European households.

AJ Power group, BaltCap Infrastructure Fund and AJP Capital's Solar Core Plus Fund have signed an agreement to establish a joint venture to develop solar energy generation in Latvia. 30 MW solar farms will be built over the next 3 years. The plan also foresees expansion across the Baltics and increasing the capacity of the solar plant portfolio to 100 MW.

Latvia could achieve considerable energy savings by renovating its building stock. Latvia holds considerable potential to accelerate energy efficiency outcomes in the buildings sector, which will go a long way toward meeting climate targets and lowering energy bills. Latvia's energy demand is dominated by an ageing building stock, which ...
