

What are the challenges facing China's energy storage incentive policy?

The most critical challenge among them is the high level of policy uncertainty. China's energy storage incentive policies are imperfect, and there are problems such as insufficient local policy implementation and lack of long-term mechanisms.

How does policy uncertainty affect energy storage technology investment in China?

Policy adjustment frequency and subsidy adjustment magnitude are considered. Technological innovation level can offset adverse effects of policy uncertainty. Current investment in energy storage technology without high economics in China. Subsidies of at least 0.169 yuan/kWh to trigger energy storage technology investment.

Should China invest in energy storage technology?

Subsidies of at least 0.169 yuan/kWh to trigger energy storage technology investment. Energy storage technology is one of the critical supporting technologies to achieve carbon neutrality target. However, the investment in energy storage technology in China faces policy and other uncertain factors.

What is the investment threshold for the second energy storage technology?

However, the two investment strategies have opposite findings for the second energy storage technology. The investment threshold for the second technology under the single strategy is significantly lower at 0.0310 USD/kWh than the investment threshold under the continuous strategy at 0.0792 USD/kWh.

How to choose the best energy storage investment scheme?

By solving for the investment threshold and investment opportunity value under various uncertainties and different strategies, the optimal investment scheme can be obtained. Finally, to verify the validity of the model, it is applied to investment decisions for energy storage participation in China's peaking auxiliary service market.

Will phase-down policy increase energy storage investment thresholds?

With an increase in adjustment policy frequency or subsidy magnitude under the phase-down policy, although the investment threshold of energy storage technology will all rise, the rise in investment thresholds is significantly different. Policy implementation should use more long-term, stable incentives.

Established in 2017, Lei Shing Hong Energy ("LSHE") is a wholly-owned subsidiary of Lei Shing Hong Limited ("LSH"). Relying on the world's leading gas power generation equipment, PV ...

Xia Ding was originally a general's son in Xiqi City. The barbarian's invasion killed his parents and all the soldiers in there. Xia Ding fled to Taiping Town and grew up here with the girl A Li. Xia Ding fought against the ...
