

The main challenges of liquid hydrogen (H<sub>2</sub>) storage as one of the most promising techniques for large-scale transport and long-term storage include its high specific energy consumption (SEC), low exergy efficiency, ...

The Hydrogen Shot Summit August 31 & September 1, 2021  
o Goal: Identify pathways to meet Hydrogen Shot target of \$1 per 1 kilogram in 1 decade.  
o Target audience: stakeholders from ...

Although hydrogen storage in liquid form reaches a higher density (71.0 kg/m<sup>3</sup>; at 20 K and 0.4 MPa) than its compressed gaseous state (39.1 kg/m<sup>3</sup>; at 300 K and 70 MPa), the ...

The growing interest in hydrogen (H<sub>2</sub>) has motivated process engineers and industrialists to investigate the potential of liquid hydrogen (LH<sub>2</sub>) storage. LH<sub>2</sub> is an essential component in the H<sub>2</sub> supply chain. Many ...

Reducing CO<sub>2</sub> emissions is an urgent global priority. The enforcement of a CO<sub>2</sub> tax, stringent regulations, and investment in renewables are some of the mitigation strategies ...

The development of efficient liquid carriers is part of the work of the International Energy Agency Task 40: Hydrogen-Based Energy Storage. Here, we report the state-of-the-art ...

o Obtaining and liquefying hydrogen is energy intensive, so we need to preserve that investment!  
o Eliminating boiloff, even a small amount, can have a large positive impact! Back to our case ...

The new storage tank incorporates two new energy-efficient technologies to provide large-scale liquid hydrogen storage and control capability by combining both active thermal control and ...
