

While there has been some recent momentum stemming from the dialogue between the Government and armed groups, the Central African Republic needs a recommitment to positive energy ahead of its elections set for 2025, several United Nations officials told the Security Council today.

The Central African Republic's gross government debt, projected at 49.1% of GDP in 2023, is close to the low-income developing countries" (LIDC) average of 48.3%. The country is projected to collect 13.8% of GDP in revenue this year, which is slightly less than the LIDC group ratio of ...

In 2008, the Central African Republic (CAR) became the fourth country to be placed on the agenda of the UN Peacebuilding Commission. In addition to poor governance, insecurity, high inequality and social marginalization, the management of CAR's abundant natural resources represents one the many challenges to stability faced by this impoverished nation of 4.3 million ...

6 ???&#0183; Central African Republic, landlocked country located in the centre of Africa. The area that is now the Central African Republic has been settled for at least 8,000 years. The earliest inhabitants were the probable ancestors of today's Aka (Pygmy) peoples, who live in the western and southern forested regions of the country. The slave state of Dar al-Kuti occupied the ...

The Central African Republic's economy energy intensity (the ratio of the quantity of energy consumption per unit of economic output) was 7.2 MJ per US dollar (2005 dollars at PPP) in 2012, down from 13.8 MJ per US dollar in 1990. The compound annual growth rate

Air and water pollution is a major environmental problem in CAR. Annual outdoor PM2.5 levels in CAR can reach 57 &#181;g / m<sup>3</sup>, which exceeds the recommended maximum of 10ug / m<sup>3</sup>, especially in urban centers like Bangui [1]. In addition, the majority of the Central African population is regularly exposed to dangerous levels of indoor air pollution since more than 90% of the ...

Challenge With just three percent of its population having reliable access to power, the Central African Republic has one of the lowest rates of electrification in the world. In addition to limiting the quality of life, this lack of electricity restrains economic growth, as well as access to telecommunications services.
