

What is Luxembourg doing about energy security?

Luxembourg is also actively cooperating with neighbouring countries on energy security and is planning to strengthen its electricity grid to support additional imports and domestic renewable generation.

What is Luxembourg doing to ensure a secure supply of electricity?

The IEA report notes that Luxembourg is undertaking actions on several fronts to ensure a secure supply of electricity. The country is aiming to increase domestic electricity generation to cover one-third of national demand by 2030, mostly from solar PV and wind.

What challenges does Luxembourg face in achieving its energy objectives?

The report notes that Luxembourg faces challenges in achieving its energy objectives. The country's energy supply is dominated by fossil fuels, and carbon dioxide emissions are rising since 2016. This trend is driven by higher fuel consumption in the transport sector, mostly from fuel sales to international freight trucks and commuters.
