

Will solarduck install a 780kw offshore floating solar plant in Malaysia?

SolarDuck will install a 780kW offshore floating solar plant off the coast of Tioman island in Malaysia, to assess technical and economic feasibility of such projects in Malaysia. The installation is targeted to be completed by 2025, according to the partners.

Who is solarduck partnering with?

As part of the global roll out of offshore floating solar technology, SolarDuck teamed up with TNB Renewables and TNB Research, as well as with aluminium and energy company Hydro Extrusion Norway, to advance offshore solar energy solutions in Malaysia and Southeast Asia.

Will solarduck develop a 780kw floating solar plant off tioaman Island?

Dutch-Norwegian company SolarDuck has signed a letter of intent with subsidiaries of Tenaga Nasional Berhad (TNB), the largest utility in Malaysia, to develop a 780kW offshore floating solar plant off the coast of Tioaman island.

What will hydro do for solarduck offshore floating solar plant?

Hydro will provide engineering support, and will manufacture and deliver the aluminium components used for the 780 kW SolarDuck offshore floating solar plant. The installation off the coast of Tioman Island in Malaysia is scheduled to be concluded in 2025. "Solar energy is part of the necessary shift to renewable energy."

How will dMEC support solarduck?

Via the subsidy, MARIN will support SolarDuck in the technical evaluation of surviving the harsh environmental conditions on the sea, while DMEC will support the company with investment and funding strategy development. As part of the project, INNOSEA will back SolarDuck with levelised cost of electricity (LCoE) analysis.

Are extruded aluminium profiles a good fit for solarduck?

Extruded aluminium solutions are the perfect fit for such installations with their light weight and strength, and the fact that they require little or no maintenance," says Bruno D'hondt, senior vice president in Hydro Extrusions. In 2021, Hydro delivered the aluminium profiles for SolarDuck's pilot structure.
