

Did Mali import energy?

Mali did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used. For example, crude oil is refined into many different kinds of fuels and products, while coal, oil and natural gas can be burned to generate electricity and heat.

What is the energy supply in Mali?

As in most sub-Saharan African countries, biomass (mainly in the form of firewood) provides the bulk of the energy supply (Figure 4). Mali has neither proven hydrocarbon resources nor a refinery; as a result, all petroleum products are imported through neighbouring coastal countries which impacts on the country's balance of payments.

Is biomass a good energy source in Mali?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Mali: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

What is the energy strategy of Mali?

The general energy strategy of Mali focuses on the development of local resources such as hydropower and solar energy in order to reduce petroleum imports. Objectives of the National Energy Policy regarding renewable energy are: Promotion of RE.

Is Mali ready to scale up renewables?

The Ministry, working through the Mali Renewable Energy Agency (AER-Mali), has initiated a partnership with the International Renewable Energy Agency (IRENA) to assess Mali's readiness to scale up renewables.

Will Mali get a large solar power plant?

As far as the energy transition is concerned, UEMOA has carried out an installation study for large solar power plants, identifying five sites - which include Mali - for a total capacity of 574 megawatts (MW), to be commissioned by 2030.
