

Since the standard conduction and forced-air convection techniques are no longer able to provide adequate cooling for sophisticated electronic systems, new solutions, such as liquid cooling, ...

Stable & Long-Lasting: Built-in high-speed fan cooling maintains stable performance during long engraving sessions, while the laser boasts a lifetime exceeding 10,000 hours, ensuring ...

Typical advancements have been found in the categories which span from high-performance liquid metal convection cooling technology, low melting point metal phase change material, ...
