

How will Mozambique benefit from a more distributed power system?

With this strategy, Mozambique will also avoid locking the systems in for decades to come with large baseload plants, and benefit from a more distributed power system.

Is Mozambique a low-renewable country?

In this study, the domestic electricity demand of Mozambique is estimated to grow from 7 TWh in 2022 to 26 TWh in 2032. In the Low Renewables scenario, the total solar, wind and hydro generation in the system in 2032 is 7.3 TWh, resulting in a renewable share of 28% of the total power generated.

Why is Mozambique focusing on hydropower projects?

Since Mozambique has high hydro power potential, the country is focusing on developing large hydro projects that aim to be operational at the beginning of 2030's. Hydropower projects play an important role in decarbonizing the power sector in Mozambique.

Can Mozambique increase gas-to-power generation?

Going forward, the development of new gas resources by the Mozambican government presents tremendous opportunities to rapidly increase gas-to-power generation in the country. Domestic gas from the Northern coast of Mozambique is expected to be available by 2026.

Electricidade de Moçambique (EDM) is a state-owned energy company that engages in the generation, transmission, distribution and sale of electricity at a national level.. In its generation function, EDM coordinates and manages the ...
