

What will NamPower do for Namibia?

NamPower will be able to maintain pace with evolving and increasing electricity needs of the country. The line will be key to unlocking increased access to variable renewable energy (VRE) within Namibia, as well as facilitate regional electricity trading.

Why does Namibia need a new electricity network?

The national power utility said the expansion of the electricity network and lines is necessary to provide for the current and future national load requirements as the needs of an expanding Namibian population will require, including the needs of an economy that is growing.

Is Namibia on a new path to energy transition?

Namibia is also embarking on a major green hydrogen investment drive, and several developers are interested in establishing large generation plants to sell into the regional power pool. Cumulatively, these developments seem to be setting Namibia on a new path that will likely accelerate the country's energy transition.

5. Discussion

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Can Namibia become a regional power exporter?

As a result, many political decision-makers have been convinced that a private-sector-led capacity-expansion program built on renewables is a viable path to ensure the country's energy security and transform Namibia into a regional power exporter. The third, closely related factor is the cost of power.

Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying ...

RECOM and its subsidiary Power Control Systems as specialist for customised solutions, offers a range of AC/DC and DC/DC suitable for the applications, along with battery conditioners and power factor "front ends". Proven platform designs are used which can be adapted to customer specifications for new custom

designs.

The log-in process could take up to 2 days due to individually processing. Thank you very much for your kind understanding.

RECOM Power

Read blog postings with insights into the world of power conversion from the RECOM team. Subjects vary from "quick guides to the essentials" of different topics, to a message direct from RECOM owner Karsten Bier with his thoughts about the COVID pandemic and how RECOM is playing its part to help manufacturers of medical equipment.

RECOM's application notes offer valuable information about the application of our isolated and non-isolated DC/DC and AC/DC converters in regards to their function, temperature and cooling considerations, input and outputs, filtering, protections, earth connections, isolation, solder reflow profiles, packaging and more. A 41-page document, the application notes provide a wealth of ...

Solar Suppliers in Namibia. ... Solar energy is radiant light and heat from the Sun that is harnessed using a range of technologies such as solar power to generate electricity, solar thermal energy, and solar architecture. 2022 Intakes in Namibia [Universities, Colleges, VTC Intake] ... Recom-tech, RCM-700-8DBHM, 700 W, 22.5%; Canadian Solar ...

RECOM Power | 5,791 followers on LinkedIn. WE POWER YOUR PRODUCTS | We at RECOM have been innovators in the field of electronic power converters and providing exceptional customer service for over four decades. Not only do we pride ourselves on being an industry leader in the fields of electronics, engineering (including transportation), industrial automation ...

RECOM Power has announced the acquisition of 75% of Power Control Systems based in San Vendemiano near Conegliano/Italy. This well-established company focuses on the design and manufacture of AC/DC and

DC/DC power supplies from 3W up to 10kW for Railway, Medical, Military and Industrial applications. ...  
The RECOM Group has consistently grown ...
