

What will TotalEnergies do in New Caledonia?

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.

Why has Tesla signed a new supply agreement with New Caledonia?

Tesla has signed a new supply agreement in order to secure a large amount of nickel from New Caledonia for battery production. Over the last year, Tesla CEO Elon Musk has been pushing for nickel producers to boost production as he expects the resource could become a bottleneck for battery production.

How does Prony resources contribute to New Caledonia's development?

A participant in the global energy transition, Prony Resources sustainably contributes to New Caledonia's development by processing its nickel and cobalt resources in accordance with the highest industrial and environmental standards.

Why do we support New Caledonia's energy transition?

We are very proud to support their energy transition, and that of New Caledonia, said Thierry Muller, CEO of TotalEnergies Renewables France. "As industrial firms, we think and act responsibly. Our two companies are committed to protecting natural resources and biodiversity, and to improving the situation of local communities.

Does New Caledonia have a nickel industry?

That slammed the nickel industry-reliant economy. New Caledonia's mining industry is struggling to compete against Indonesia, the world's largest nickel producer, due to decades of export restrictions and high energy costs that have made its nickel more expensive and less profitable to produce.

Could a plant in New Caledonia make electric car batteries better?

Nickel is vital to electric car batteries, but extracting it is dirty and destructive. A plant with a turbulent history in New Caledonia is about to become an experiment in doing it better. GORO, New Caledonia -- From the reef-fringed coast of New Caledonia, the Coral Sea stretches into the South Pacific.

Power Plant Electrical Technologies is an integrated electrical organization. It is accredited with design, providing electrical services including studies, design, equipment supply, installation and commissioning for high, medium and low voltage control systems to mining operations, utilities and industries. In Africa, for Africa.

Enercal Poya Solar PV Park is a 30MW solar PV power project. It is planned in North Province, New Caledonia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a single phase.

Indian multinational conglomerate JSW Group has reportedly entered an exclusive agreement to acquire energy company Mytrah Energy India Private for an enterprise value of \$2bn.. Based in Hyderabad, India, Mytrah is ...

Belgium-based Mithra has faced severe financial difficulties in the past few years with share prices tanking by more than 90%. Efforts to extend its cash runway, which included raising \$13.7m by selling its stake in Mayne Pharma, were unsuccessful, forcing the company to file for bankruptcy and siphon off its remaining holdings.. The transfer will see Gedeon Richter ...
