

What is the Energy Storage Systems Campus project?

The Energy Storage Systems Campus project is a \$30 million initiative allocated from a federal agency, which is the largest allocation the University of Texas Dallas has received to date. This project is expected to leverage and stimulate over \$200 million in private capital. Dr. Kyeongjae Cho displays a finished battery and the hardware used to test its efficiency.

How long does energy storage last?

BloombergNEF reported a global total of 1.4 gigawatts and 8.2 gigawatt-hours of long-duration energy storage as of last September, excluding pumped hydro. The average duration, which you can calculate by dividing gigawatt-hours by gigawatts, was 5.9 hours.

Who is partnering with a DOE Energy Storage Company?

Key partners in the initiative include LEAP Manufacturing, a consortium of energy storage companies, AUI (Associated Universities Inc.), the University of California, Berkeley, and the University of Chicago. The agreement provides funding from the DOD's Manufacturing Capability Expansion and Investment Prioritization Directorate.
