

What is Nomad & how does it work?

NOMAD was founded in 2020 by KORE Power with one simple goal: to provide reliable energy systems that can be deployed anywhere they are needed. Mobilizing energy storage unlocks a wide range of applications that fixed assets cannot achieve, including integrating renewables and modernizing disaster response and relief efforts.

Who is nomad power?

When it comes to specialization in the development, manufacturing and marketing of advanced power electronics as well as systems for mobile power markets, one name quickly comes to mind: NOMAD POWER. Our continuously developing knowledge and experience with advanced power electronics is what we, as a company, take pride in.

How does Nomad powerdock work?

Rapidly respond to changing grid conditions and bolster energy security Stack fixed and mobile energy storage assets to modernize your energy strategy while retaining the agility of relocating when and where energy support is needed The Nomad Powerdock system connects you to power in any environment with one seamless integration.

How can Nomad transportable power systems capture a large market share?

Mr. Noble has cultivated numerous client relationships by managing internal and external sales activities, including manufacturing representatives and distributor channels. His economic development expertise, sales cycles, and successful revenue generation will help Nomad Transportable Power Systems capture a large market share.

How can a military use Nomad?

Deploy temporary EV charging points and eliminate the need for costly fixed storage infrastructure at e-freight or e-transit charging installations. Rapidly deploy NOMAD to support disaster relief efforts and restore power grids. Likewise, defense interests can utilize NOMAD to mitigate energy security concerns at remote bases or outposts.
