

Why is Norfolk Island transitioning to green energy?

Norfolk Island is transitioning to green energy to reduce its dependence on diesel-fired generation, which is becoming more expensive and more difficult to source as countries around the world seek to decarbonize their economies. This initiative is comprised of several interrelated elements: Project Background

Is Island Green Power planning a solar & battery energy storage project?

Island Green Power has unveiled plans for a utility-scale solar and battery energy storage project in Norfolk, England.

What is Norfolk Island's diesel-fired generation initiative?

This initiative is comprised of several interrelated elements: Project Background In 2022, the Commonwealth Government provided a \$5.25 million grant to Norfolk Island Regional Council to transition the island away from diesel-fired generation.

Is Norfolk Island a 'duck curve'?

Energy experts often point to so-called "duck curves" in the California market and in Queensland, due to the growth of solar, but Norfolk Island is well ahead - in fact, it is already dealing with the excess of solar output over demand that is predicted for South Australia, Western Australia and Tasmania in the next 10 years.
