

# North korea energy storage cabin quotation

Does North Korea have a two-tier energy system?

Under North Korea's two-tier energy system, which prioritises industrial facilities, the only way for many citizens to access electricity is to pay state functionaries to allow them to install cables to siphon off power from local factories.

Does North Korea have a wind farm?

Both wind and wave resources in North Korea have the potential to make an impact on the country's energy generation and create more consistent access to electricity. Despite this, few larger-scale wind farms--and only one tidal power station--contribute to the North's energy supply.

Is North Korea pursuing energy-producing alternatives to sanctioned resources?

The pursuit of energy-producing alternatives to heavily sanctioned resources, such as coal and oil, has been a central focus of North Korean economic policy under Kim Jong Un since he assumed power in 2012.
