

Which government departments do us energy firms need to work in Myanmar?

In addition to the above seven authorized departments, U.S. energy firms should understand the roles of the Ministry of Planning and Finance, the Myanmar Investment Commission (MIC), the Ministry of Natural Resources and Environmental Conservation (MoNREC), and the National Commission for Environmental Affairs (NCEA).

Which coal-fired power plant is in Myanmar?

Tigyit coal-fired power plant, the only coal power plant in Myanmar, operated by a joint venture between the China National Heavy Machinery Corporation and a group of Myanmar businessmen affiliated with the military, is producing 120MW and is connected to the national grid.

How many hydropower stations are there in Burma?

Burma has 27 operating hydropower stations with a total installed capacity of 3,262 MW, with eight stations under construction. Five of the existing power stations were constructed on a build-operate-transfer (BOT) contract, and three hydropower stations with a combined capacity of 939 MW have been developed under joint ventures with foreign firms.

How much coal does Burma have?

Although Burma has estimated domestic coal resources of 540 million tons, coal extraction has remained slow due to low investment and the remoteness of the country's identified coal sites. To achieve Burma's electrification goals, serious investment in infrastructure development and power generation is needed.
