You would need at least 2 12V batteries in parallel if they have a 200A BMS. Since you want at least 300Ah capacity then you could put 3 12V 100Ah batteries in parallel. This will give you 300Ah of capacity and either 300A (100A BMS) or 600A (200A BMS) of discharge current, either of which will support the 3000W inverter.
