

Will Oman Petroleum & Energy show be co-located with Oman Sustainability Week?

Oman Petroleum & Energy Show is set to be co-located with Oman Sustainability Week for the very first time in 2025. With both events jointly taking place at the Oman Convention and Exhibition Centre, the co-location will bring together policymakers and key stakeholders from across the energy and sustainability verticals under one roof.

What will Oman's new energy policy mean for the energy sector?

The move - a first in Oman's power sector - will help support the large-scale adoption of renewable energy resources for electricity generation, as well as accelerate the decarbonization of the electricity sector, according to a key executive of the state-owned entity - a member of Nama Group.

What is energy storage Forum?

We are Europe's first conference dedicated solely to energy storage since 2010. All of our Forum's culminate with the unique Building the Action Plan feature. Join us for this session and take back an action list to the workplace.

What is energy storage?

Energy storage encompasses the ability to capture energy at a time of, say, surplus availability, for use later at a time when access to an energy source is either unavailable, limited in supply or intermittent.

Why is energy storage a problem in the EU?

Energy storage suffers from lack of regulatory certainty within the EU. While a number of member states - Germany and the UK especially - have made great strides in adoption levels, lack of consistency is a looming issue.

Will the UK reduce energy storage capacity by 2021?

In the UK, the All-Party Parliamentary Group (APPG) on Energy Storage claim that current government policy will reduce the storage capacity deployed by 2021 from a potential 12 GW to 8 GW. The European Association for Storage of Energy (EASE) have also stated that regulations must keep up with advances for the technology to flourish.
