

Should you buy a solar lamp from PAYGO?

PAYGO makes solar products affordable for some customer groups, while two thirds of the would prefer lower instalments and report to still have challenges to pay over USD 4. People using PAYGO tend to spend more for their lighting services than people without a solar lamp.

Can you afford a solar system?

People can afford the small instalments and pay for their solar energy needs: Impact studies showed households using solar systems by Azuri benefit from significantly more hours of light and from the ability to charge phones at home.

Who owns PAYGO solar in Nigeria?

In the fourth quarter of 2016, private equity firms invested over USD 60 million in Nigerian mobile PAYGO solar provider Mobisol and Lumos Global, which is selling emissions-free electricity services from solar-storage micro-grids. Both companies sell larger systems than the original PAYGO pioneers.

Why should you buy a solar product via PAYGO?

PAYGO offer the possibility to establish a track record of payed back credit. After the purchase via PAYGO of a solar product, the household not only has a good rating with financing institutions, but also a collateral to continue with the same (or similar) amount of instalments to buy other products.

How does PAYGO work?

Companies applying PAYGO approaches manage to raise large-scale working capital from investors to finance up-front costs. Those companies often do not have access to traditional financing institutions like banks, but due to their demand are expected to be served with less expensive loans in the long run.
