

What is the Philippine Energy Plan 2020-2040?

The Philippine Energy Plan (PEP) 2020-2040 is the second comprehensive energy blueprint supporting the government's long-term vision known as Ambisyon Natin 2040. This updated plan, like its predecessor (PEP 2018-2040), reiterates the energy sector's goal to chart a transformative direction towards attaining a clean energy future.

What is elxisenergy's pre-ordered panel?

ElxisEnergy is close to its first major pre-ordered panel, where a % of share will be returned to our token (LEX), in our exchange, a process which will take place in the summer. A share of funds invested in our company and in our token (LEX) will also be returned, a process that will also be completed within the summer.

Will the Philippines achieve universal electrification by 2022?

The Philippines has made significant progress in delivering electricity access,boosting the household electrification rate past 90% in 2016. The country is on track to meet the target of achieving universal electrification by 2022,as set out in the Phil

How is energy used in Philippines?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Why should the Philippines invest in energy storage?

Bolstering decarbonization goals: The Philippines is a signatory to the Paris agreement and is committed to reducing greenhouse gas emissions. Energy storage facilitates the integration of renewable energy,supporting the transition to a cleaner energy mix.

How will snap support the Philippines' energy transition plans?

With BESS technology expected to support the Philippines' energy transition plans,SNAP's Magat facility in particular will enhance power-grid flexibility,mitigate power fluctuations,and optimize energy distribution. Energy storage systems are expected to play a critical role in the Philippines,offering these benefits:
