

Does Tejas Borja use solar energy?

Thanks to these technological developments, Tejas Borja has expanded its catalogue to include a range of products which harvest solar energy. These products integrate perfectly into the flat ceramic tiles in the "Flat" range so that they have minimal impact on the original design of the project.

Which Tejas Borja Solar tiles are compatible?

Tejas Borja's SOLAR range As another option in the Tejas Borja solar range, we offer a format compatible with our other flat ceramic tile model, the Flat-10. The SOLAR FLAT-10 tile is the same size as 5 ceramic tiles with the same model name and incorporates CIGS technology in its photovoltaic panel.

How much power will a solar power project produce in the Philippines?

The project is going to have a solar power capacity of 3,500 megawatts (MW) and a battery storage system with 4,500 megawatt-hour (MWh) of energy storage capacity. The project is supposed to produce electricity for more than 2 million households in the Philippines once it's full operational in about 3 years (in 2027).

What makes a Tejas Borja a durable roof?

Durability and performance over time is reinforced by the structure of the product itself and the use of glass-glass panel (double tempered glass) that ensures a durable and watertight encapsulation. Find out more about: Tejas Borja SOLAR product range | Products that are perfectly integrated into flat tile roofs from Tejas Borja "Flat" range.

Who can open solar energy zones in the Philippines?

These solar energy zones will be opened to both partners and third-party locators who want to build and operate solar farms. Solar Philippines deployed a 750-strong land acquisition and permitting workforce, over the past six years to secure lease and purchase agreements for these solar energy zones.

Where is Solar Philippines located?

Through our subsidiary Solar Philippines Calatagan Corporation, we built a 63.3MW solar farm in Calatagan, Batangas. Since the start of its operation in 2016, it has generated over 500GWh of clean energy, enough to power over six municipalities in Batangas, while sourcing the majority of its workforce from the locals in nearby areas. LOCATION:
