

What is agrivoltaics in Poland?

Agrivoltaics is the simultaneous use of land for agricultural production and electricity generation. It is much more than a new pathway for the solar sector; it is an innovative form of investment that is gaining popularity in Europe and around the world. In Poland, AgriPV projects are not yet known and little knowledge is available.

How much solar energy does Poland have in 2021?

In 2021 alone, the country added around 3.2 GW of solar PV installations. With a cumulative installed solar PV capacity of 7.1 GW at the end of 2021, Poland is now a major European solar energy market, with many investors developing large-scale projects far exceeding the 100 MW project scale.

Why are solar installations increasing in Poland?

The sudden increase in solar installations in recent years was mainly due to Poland's rooftop PV incentive program and its net metering schemes, which ended by 1 April 2022, but also due to a 'contract for difference' (CfD) tender scheme for 1 MWp solar farms implemented at the end of 2016.

Is Poland a good place to invest in solar?

Introduction Poland is now one of the Top 5 solar PV investment markets in Europe. In 2021 alone, the country added around 3.2 GW of solar PV installations.

Can agrivoltaics be taxed in Poland?

Taxation of PV installations coexisting with agricultural production Agrivoltaics is a new solution, unknown to the Polish tax law, combining agricultural production with generation of electricity from PV panels at the same site. Currently, there are no tax and legal regulations dedicated to AgriPV and taking into account its specific features.

How do PV panels benefit a farm?

The PV panels protect the plants from excessive sunlight, rain, hail and wind. And the farm owner gains an additional source of income - either from the sale of energy or in the lease of land for the farm. EC Group is a leading distributor of photovoltaic modules in the Polish market.

TAMS support is now available to support up to 11kW solar PV on dairy, beef, tillage and sheep farms; 40pc support was already available to the pig and poultry sector, and ...

Within our turkey business, a new project has been initiated to install solar panels to help power two facilities in Poland. In June 2021, solar installations were built on laying farms located in Woplawki and Sykstyny. The ...

Why solar makes sense for poultry farms By Shaun Mayhew October 20, 2023 . Features Emerging Trends Energy Week Farm Business. Five reasons poultry barns should adopt renewable energy by going solar. ...
