

How much energy does Portugal generate from renewables?

Portugal generated an 'historic' 95 per cent of its electricity from renewables in April, according to the network operator REN. Renewable energy generation averaged just below that for the first four months of the year, covering 91 per cent of the nation's power needs.

How does Portugal achieve 80% of its energy needs?

Portugal has set ambitious targets for renewable energy, aiming to achieve 80% of its energy needs from renewable sources by 2030. To achieve this, Portugal has implemented several policies, including feed-in tariffs, tax incentives, and subsidies for renewable energy projects.

What is Portugal's energy transformation?

Portugal's transformation is more than just about energy production; it's a narrative of resilience, innovation, and community spirit. As the country forges ahead, its commitment to renewable energy serves as a powerful reminder that a brighter, greener future is possible, and it begins with each of us.

How many GWh of electricity is produced in Portugal in 2022?

Quite an achievement for a small country. In January 2022, 4,085 GWh of electricity were generated in mainland Portugal, where 63.64% came from renewable sources being 31.27% wind, 17.78% hydro, 6.99% bioenergy, 3.80% solar and 3.80% pumping.

Is Portugal a good renewable leader?

Portugal had the third highest share of wind energy in its electricity mix last year at 29 per cent, behind Ireland (36 per cent) and Denmark (58 per cent). But, as elsewhere, it's no good a renewable leader resting on its laurels.

How much solar energy does Portugal produce?

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country generated more than 3.99 TWh of solar energy in just the first nine months, exceeding last year's total of 3.6 TWh.
