

Who is developing Puerto Rico's energy grid?

Development is led by Clean Flexible Energy, an indirect subsidiary of AES Corp. and TotalEnergies Holdings USA. A conditional loan guarantee was announced for the project in July. Puerto Rico is aiming to eliminate coal-fired energy generation by 2028 and develop a 100% renewable energy grid by 2050.

What is the Puerto Rico energy Resilience Fund?

The President authorized \$1 billion for the establishment of the Puerto Rico Energy Resilience Fund in 2022 to drive investments in renewable and resilient energy infrastructure on the island. A community benefits plan required by DOE "is being finalized and will be released to the public soon," the agency said.

How much energy will Marahu solar power?

The Marahu solar installations are expected to produce approximately 460,000 MWh of energy annually, or enough to power approximately 43,000 homes, according to DOE. The solar and storage resources DOE is supporting will "improve the grid's resilience and help reduce energy costs," Secretary of Energy Jennifer Granholm said in a statement.

What happened to Puerto Rico's electricity grid?

A worker installs rooftop solar panels on a home in Puerto Rico. The island's electric grid was destroyed by Hurricane Maria in 2017, resulting in a plan to modernize and decarbonize. Courtesy of Sunrun This audio is auto-generated. Please let us know if you have feedback

Puerto Rico: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
