Rainbow Solar Power Solutions and Automations is a division of Rainbow Enterprises, Rainbow Engineering Services, and specializes in offering comprehensive solar power On-Grid as well as Off-Grid systems. They design, install, and commission solar power systems according to the customers' needs.

Does Nepal have a solar power plan?

Although the Nepal Electricity Authority (NEA) has officially been able to buy solar power under long-term PPAs since July 2014, the majority of projects granted these contracts have been large-scale hydropower plants. Following slow activity, plans are finally afoot, however, to boost the country's solar footprint.

Will Nepal achieve net-zero emissions by 2045?

The Government of Nepal (GoN) pledged at COP26 to attain net-zero emissions by 2045, but the goal now appears much more ambitious given the recent increase in the share of renewable energy sources. Hydropower is used to generate the majority of the nation's electricity, and the majority of these sources are Run of River (RoR) types.
