

Where does solar energy come from in Syria?

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

How much does a solar panel cost in Syria?

The price of a panel capable of charging a small battery and lighting a room is about 80,000 Syrian pounds, regardless of its quality, while the monthly salary of her husband, who is an employee in an agricultural establishment affiliated with the Syrian regime, is about 110,000 Syrian pounds.

Who is Assad and what did he do?

Assad is the second generation of an autocratic family dynasty that held power in Syria for more than five decades. A former ophthalmologist who studied in London, Assad took power in an unopposed election following the death of his father Hafez al-Assad, who had led the Baath Party since seizing power in 1970.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

Is Assad ready to cooperate with rebels?

There was no comment from Mr. al-Assad. His prime minister, Mohammad Ghazi al-Jalali, stayed behind and said he was ready to cooperate with the rebels. The opposition forces swept into Damascus with little apparent resistance from the Syrian military, seizing control of government buildings and the state broadcaster.
