

What are RCT power storage systems?

RCT Power storage systems offer a particularly efficient storage solution for residential photovoltaic systems. The modular design is suitable for use with new as well as retrofitting of existing PV systems. The components of the power storage systems are a battery, a battery inverter and a sensor.

Are RCT power battery storage systems efficient?

The high-quality power storage units from RCT Power are among the most efficient battery storage systems on the market and have already received several efficiency awards. Year on year, the Berlin University of Applied Sciences (HTW Berlin) publishes the results of their power storage system inspection.

What is RCT Power App?

With the powerful RCT Power App you can manage and control all functions of your storage system 233 kWh battery storage for commercial applications. This all-in-one storage system offers maximum power in a small space 466-932 kWh battery storage for industrial applications. This storage solution offers highest efficiency.

Why should you choose RCT power?

The modular and intelligent storage systems from RCT Power offer solutions to meet your needs. The high system efficiency (confirmed by independent research institutes) and easy installation are convincing. The systems also include many additional features such as shadowing management and forecast-based charging management.

Who is RCT power?

data visualisation and various configuration options. RCT Power is a technology leader in stationary storage solutions for domestic use. The brand has its origin in the city of Konstanz, Germany. Here we have assembled an experienced team of experts in the field of power electronics.

How does the RCT power battery work?

The RCT Power Battery stores your solar energy for use when the sun is not shining. Paired with solar modules, provides clean energy and recharges the RCT Power Battery efficiently. The modular design integrates easily into the building environment. A multicolor LED light path displays the current status.
