

What is the recurve platform?

The Recurve platform implements the CalTRACK methods via the open source OpenEEmeter to support transparent market transactions for distributed energy resources, and is supported by one of the largest open source foundations in the world. Learn more about how we're turning demand flexibility into a market-based procurable resource.

How does recurve flexmarket work?

Recurve's user-friendly demand flexibility platform, FLEXmarket, enables virtual power plants by paying aggregators for the value their services deliver to the grid.

Who is the CPA at Recurve?

C.J. is a CPA at Recurve with a passion for people and data-driven insights. Her experience helping several startups scale, from Series A-E rounds to notable acquisitions, makes her an invaluable asset to Recurve, especially when the company is poised for significant growth.

What is Cara's role at Recurve?

At Recurve, Cara's role involves committing to securing digital landscapes and building resilient infrastructure. She brings about measurable progress and positive impact with her extensive experience, professional rigor, and constant drive for knowledge.

LF Energy, a new initiative of the Linux Foundation (the undisputed leader in fostering open source collaboration) opens the next level of collaboration for the energy industry by providing a neutral environment in which to build the digital foundations for the energy system of tomorrow. Much like the transformations seen in the telecommunications industry, this ...

The Nepal Renewable Energy Programme (NREP) is a Government of Nepal Programme with financial assistance of the British Embassy in Kathmandu. NREP aims to significantly increase private sector investment in the distributed sustainable energy market. It is implemented by the Alternative Energy Promotion Centre and a consortium led by DAI Global ...

Recurve, a data software startup for utilities, has raised \$18 million in Series B funding, the company exclusively tells Axios. Why it matters: The historically dull utility space is increasingly exciting for investors as the ...

Recurve has built a SaaS open-source platform for calculating and analyzing energy efficiency savings. The platform uses smart meter data and advanced analytics to render transparent, replicable, and real-time energy efficiency calculations for major utilities, national scale program implementers, state regulators and private efficiency companies.

A virtual power plant pools the collective power of smaller distributed energy resources. Managing demand through virtual power plants can help both stabilize the grid and enable cost savings for end use customers. ... Market Access is based on the groundbreaking FLEXmarket platform created by Recurve. Market Access is now available to pay ...

As part of the TECH implementation team, Energy Solutions and Recurve analyzed residential energy meter data from across California. In doing so, we uncovered a simple but consequential fact - customers with high summer air conditioning use and low winter heating needs are the most likely to save money by switching from a gas-powered furnace ...

In its mission to accelerate the transition to a clean energy economy, Recurve integrates behind-the-meter demand flexibility resources into the emerging carbon-free energy grid, providing companies with the real-time transparency ...

This list of recurve bows basically sums up everything that you need to know about the recurve structure, from our review of the top five on the market to our answers to frequently asked questions. If you're a newcomer or you're switching over from another type of bow, you'll leave here with a fundamental understanding of what makes a ...

flagship publication of Nepal's energy sector. The current report has been prepared to provide the information about key trends and insights of Nepal's energy supply and consumption in the fiscal year 079/80 (2023). In addition, it provides the energy consumption in different sectors viz. Residential, Commercial, Industrial etc.

Combined open-source site-level models and automated comparison groups provide revenue-grade Measurement and Verification (M& V) for both long-term energy efficiency and demand response events for seamless operation and integration of diverse energy resources within VPPs to act as energy and capacity resources. Market-based, technology agnostic.

Recurve and more specifically Olympic Recurve. I like the extra precision and longer distance plus it's fun with more gadgets along with modern materials and innovations. The wallet thinks otherwise though. Removing the sight and stabiliser to go barebow is also fun but I enjoy that more in the forest on field and 3D rounds.

Over the past two years, Recurve has been working as the technical lead on a Department of Energy initiative to develop a set of tools to solve the problem of how to unlock energy data while preserving fundamental principles of customer privacy.

Energy plays a crucial role in the global economy and has a significant impact on a country's economic standing. In Nepal, energy resources are classified into three categories: traditional, commercial, and alternative sources. Traditional sources, including firewood and bio-energy, serve as the primary energy

sources for households.

Recurve connects the dots between efficiency, electrification, renewable energy, and DERs to enable demand flexibility to become a market-based procurable resource. The transition is underway and accelerating.

Recurve's automated Extract, Transform, Load (ETL) handles datasets of virtually any size at unprecedented speed. Using internal libraries and modular code, our ETL takes the pain out of processing site, project and metered data, ...

Recurve is a company developing a SaaS platform to measure energy usage. It provides software for contractors who audit homes to increase energy efficiency and perform remodeling and construction services. The company offers FLEXmarket, a platform that enables virtual power plants by paying aggregators for the value their services deliver to ...
