

Is the Philippines generating energy from renewable resources?

In truth, the Philippines has been generating energy from renewable resources for a long while now. It has only been in recent history that more and more of the Filipino people are recognizing the benefits of renewable energies as an alternative to oil and carbon.

Will gea-4 be a major theme for the Philippines' next green energy auction?

The Philippines' Department of Energy (DOE) has said that energy storage and maximizing the country's existing renewable energy infrastructure will be a major theme for its next green energy auction. GEA-4 will take place in the final quarter of 2024. From ESS News

Does the Philippines need a 'vibrant' private sector?

It must be pointed out that the Philippines is abundant in resources and would do well to drive policies that further encourage investors, particularly from the "vibrant" private sector, said Ramnath Iyer, the research lead on Climate & Renewable Energy Finance for Asia at the Institute for Energy Economics and Financial Analysis (IEEFA).

Will the Philippines add liquefied natural gas?

As well as energy storage it is also looking into the potential of liquefied natural gas (LNG). The addition of LNG will depend on the results of tests and simulation evaluating factors such as price, contracts, capacity, and dispatch. In recent months, the Philippines has been ramping up its renewable energy deployment efforts.

Who owns solar power in the Philippines?

One of the leading private players is ACEN, which operates over 600 megawatts (MW) of wind and solar generation capacity in the Philippines and has operations in Australia, India, Laos and Vietnam.

Should the Philippines increase natural gas power plants' capacity?

BCG's Lackovic said the Philippines must increase the natural gas power plants' capacity, whilst ensuring a well-planned exit from coal for the long-term as this will entail forward visibility to investors, and coordination of investments to ensure that the capacity will be replaced by other sources as the coal plants go offline.
