

How much does a 5kw Solar System cost?

On average, you can expect to pay between \$12,000 and \$16,000 for a 5KW solar system in the US, and this cost varies depending on your location. For example, if you're in California, you may need to pay \$13,650-\$13,900 for a 5KW solar system. While in Florida, you just need to pay \$12,650-\$12,900.

How much electricity does a 5 kW solar system use?

The cost of electricity where you live is the biggest determinant of your solar savings. The table below shows the average estimated electricity production numbers for 5 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.

What factors affect the cost of a 5kw Solar System?

Apart from the location, there are more factors affecting the 5KW solar system cost, such as solar panels, charge controllers, and inverters. Solar panels come in different sizes, types, and shapes, and these factors can affect the cost of the solar system. Among them, the type of solar panels plays an important role.

Is a 5kw Solar System a good option?

A 5kW solar system could be a great option for reducing your energy bill and decreasing your carbon footprint. A 5kW solar system can produce roughly 7,300 kWh of energy annually. If a family consumes the national average of electricity, the 5 kW system would cover about 69% of the total electricity needs.
